

CGS Seismic Hazards Program: Landslide Zones

✓ Authoritative

Private Member **i**

California Department of Conservation

Summary

The map is used by cities and counties to regulate development and by property owners selling property within areas where seismic hazard zones have been identified. Local governments can withhold development permits until geologic or soils investigations are conducted for specific sites and mitigation measures are incorporated into development plans. Sellers of property use the maps to check the location of their specific site and, if applicable, disclose to the buyer that the
